

# Ergotron CareFit Slim & Element AIO Combo

Priced from

**\$7640.00**

including delivery

*\* Keyboard, mouse and basket are not included in the price.*

- ✓ 22,500 mAh of power to last a whole shift or more.
- ✓ Compact, slim and tidy.
- ✓ 21.5 inch large touch screen.

More lightweight and often cheaper than a battery cart with PC+monitor, the Carefit Slim and AIO is the perfect choice for mobile computing in a hospital environment.

Optimise your caregivers experience with a full-size screen at the right height.

Call DPI Medical today for a demo unit, or a quote with full specifications and options.

Compact SlimFit cart fits against a wall with minimum space. Handles at the side enable the cart to be manoeuvred easily down a hallway.

---

Easily adjustable height of the cart for different user heights and a sitting workstation. The screen height is also adjustable in relation to the work surface. All adjustments are tool-less.

---

The cart can be plugged in while not in use, charging the onboard hot-swap batteries. Or the batteries can be swapped out at any time during use. A battery indicator on the AIO screen shows battery life.

The keyboard slides away for storage, and when pulled out a mouse tray can be pushed out to the left or right.

Cables to the AIO can be easily routed making it tidy and easily to clean.
